MODO Architecture

MODO

MODO Architecture is a unique multi-disciplinary studio based in Melbourne, Australia. It provides design solutions that extend thresholds and blur the line between different fields of design practice. MODO projects are based on quality design which is grounded in considered and rigorous enquiry. A strong foundation of clear design strategies allows the MODO team to work with clients to realise unique and practical projects.

MODO's award winning work ranges from distinctive civic structures, sustainable mixed-use developments, private residential projects, to commercial and hospitality construction.

MODO is seeking business opportunities with clients who are interested in urbanisation developments, particularly in relation to commercial, retail and residential projects.
